SUMMARY

Full-Stack Developer with strong, in-depth experience in backend development using Laravel and PHP, and hands-on experience building modern frontend applications with React. Skilled in designing RESTful APIs, relational databases, authentication, and business logic, with growing expertise in connecting React frontends to Laravel backends through clean, maintainable, component-based architecture.

CORE SKILLS

- **Backend Development:** PHP, Laravel, RESTful APIs, API Design, Eloquent ORM, Business Logic.
- **Frontend Development:** React, JavaScript, CSS, Vite, Component-Based Architecture, REST API Integration.
- **Database:** MySQL, Database Design, ERD, Query Optimization.
- **Authentication & Security:** Laravel Sanctum, Authorization, Middleware, RBAC.
- **Tools & Practices:** Git, GitHub, Postman, Swagger, Testing (PHPUnit), Clean Code, Agile/Scrum.

EXPERIENCE

Full-Stack Developer (Laravel & React) — Freelance / Independent Projects

Sep 2024 - Present

- Developed robust backend systems and RESTful APIs using PHP, Laravel, and MySQL, with a focus on database design, authentication, authorization, and scalable business logic.
- Built modern, responsive frontend interfaces using React, JavaScript, CSS, and Vite, including reusable components and dynamic REST API integration.
- Connected React frontends to Laravel backends end-to-end, handling authentication flows, data rendering, and secure client-server communication.
- Applied MVC, separation of concerns, and clean, maintainable architecture across the full stack; used Git and GitHub throughout development.

KEY PROJECTS

Integrated Hotel Management System

Full-Stack Project

Laravel, PHP, MySQL, RESTful APIs, Laravel Sanctum, Eloquent ORM, Service Layer, RBAC, Queues, CI/CD

- Built a unified platform connecting customers, hotel management, departments, and staff, with APIs for bookings, service requests, and task management.
- Implemented separate authentication flows for customers and staff, and an automated task distribution system based on staff availability and workload.

Sweet House — Dessert E-Commerce App

Full-Stack Project

Laravel, PHP, MySQL, React, JavaScript, CSS, Vite, RESTful APIs

- Built a full-stack dessert e-commerce application, developing both the Laravel backend APIs and the React frontend interface.
- Integrated the React frontend with Laravel REST APIs for product display, cart, and order workflows.

E-Commerce Platform & Admin Dashboard

Backend Project

Laravel, PHP, MySQL, RESTful APIs, Laravel Sanctum, Eloquent ORM

- Developed the backend for an e-commerce app and admin dashboard, with APIs for products, cart, and order management, plus authentication and role-based access control.

EDUCATION

Bachelor of Information Technology Engineering

Damascus University, Damascus, Syria

Expected Graduation: 2027 | GPA: 83%

LANGUAGES

Arabic (Native) | English (Advanced) | Turkish (Very Strong)
